Agenda

Overview

InUnison is a Canadian Health & Safety company established with a focus on prioritizing the wellbeing of workers. **SoftServ**, a global technology consulting and engineering company, has forged an exclusive partnership with InUnison. This alliance aims to co-create advanced solutions for Health, Safety, and Environment (HSE), serving a diverse clientele with comprehensive services including safety program management, incident tracking, corrective actions, dynamic SOP document generation, and more.

We make occupational health and safety more accessible, more affordable, and more effective for all. We are unashamedly obsessed with one goal i.e.

MAKING THE WORLD A SAFER PLACE TO WORK

Overview

InUnison is a multi-tenant SaaS platform created to provide organizations of all sizes with access to a Health and Safety Management System (HSMS) for regulatory compliance and fostering a safety culture. Leveraging proprietary intellectual property and years of OHS expertise, we've integrated knowledge into our platform to educate users, ensure compliance, and promote safety culture.

InUnison-InTrac Enterprise Toolset

- Health and Safety Program
- Event Reporting
- Corrective Action Registry
- Credential Management
- Form Builder
- MyDocs Content Repository
- InUnison Advisory Services

InUnison is

- Delivered through a Software as a Service (SaaS) model
- Deployable down to the Worker level
- Designed to be highly scalable
- Supports translation of up to 133 languages

Health & Safety Content

The combination of rich content, world class technology and intellectual property obtained over the past 25 years, InUnison is designed to create digital Health and Safety Programs tailored to each specific National Occupational Code (NOC), WCB Code or Classification Unit, within any jurisdiction in North America.

The Health and Safety Program is administered and maintained for our clients, so they can take comfort in knowing that it is always compliant with the current regulations enabling them to focus their efforts on utilising safety processes with their workforce to lower risk and minimize loss.

The InUnison digital Health and Safety program content (Policies, Practices, Procedures and Forms) are based on regional WCB requirements and classification codes specific to ICBA Members across Canada. The program mapping will be based on any region ICBA is currently active in, however any other jurisdiction in North America can be added as the ICBA roadmap.

- > ICBA members will have access to review and acknowledge policies and > safe work practices via their **mobile** or **desktop devices**. Permission groups
 - will provide security trim to control access to Standard, Management and Administrators.

The InUnison Ple and operations i comprehensive the system, this highly valuable InUnison include track Corrective notifications. All or worker level t communication information.

The InUnison Platform is fully integrated, meaning all health, safety and operations information is in one place, and provides comprehensive real time information driven by each module within the system, this provides data and insights into business and are highly valuable to all stakeholders.

InUnison includes a suite of tools to record Events, prioritize, assign, track Corrective Actions, and execute Tasks which drive real time notifications. All information is displayed at either the organizational or worker level to ensure efficient and effective management, and the communication of all relevant health, safety, and operations

Notifications

Events, Corrective Actions, and Credentials and notifications are configured with dynamic workflow. Based on type, severity, priority, location, shelf life and reporting groups. Notifications alert stakeholders of upcoming events or actions as they occur. Pre/Post notifications are also configurable to provide reminders of overdue actions and tasks.

Credentialing

- The InUnison Credentialing identifies job positions within ICBA. These job positions are mapped to the training requirements by position.
- Expiry dates triggers notifications to users and their supervision, ensuring all team members are recertified prior to any non-compliance.
- Users are mapped to their job position to simplify tracking and management of credentials.
- InUnison empowers the user or administrator to upload valid training tickets into the system using their mobile device or desktop access.

Form Builder

nison

InUnison has embedded a powerful form builder to transform your business critical forms into digital event forms. Finally, an application that adapts to your business vs. having to settle for a form that could work... The InUnison form builder allows workflow to be incorporated into the form, instructions to the user and ease of use to develop "pick one, multiple choice, or custom question sets". Alternatively, use our library of forms and edit to the needs of your workforce.

Integrated HSMS

HSE Program

Our safety programs are OHS compliant and meet requirements for the Certificate of Recognition (COR) program and third - party sites such as ISNetworld ComplyWorks and Avetta.

Our online Event Reporting system allows users to record and track regulatory requirements such as Inspections, Hazards, Near Misses, Job/Task Observations, and Incidents to improve safety culture.

Operations & Maintenance

Automate your administrative business practices to create the highest level of efficiency possible within your organization. From your Operations and HSE to your Human Resource (HR) and Finance groups, you will be surprised how easy it can be to organize work and improve productivity levels.

Competency

Companies can often find themselves challenged by the inability to track the competency of their employees. Our Competency Management system allows users to build a database of job roles and required competencies and skill levels.

Management of Change

Management of Change (MOC) is a best practice used to ensure that risk is controlled when a company makes design, engineering, and process changes in their facilities, control streams, documentation, or operations.

OHS Event Reporting

Training Tracking

With a built-in training needs matrix based on position, you can effortlessly manage safety ticket renewals with email notifications so training will never lapse. Electronic filing your safety tickets lets you know that they are all catalogued in the same place.

DocHub

The Document Hub (DocHub) provides the ability for users to access relevant documents such as Emergency Response Plans, Safety Data Sheets (SDS), Site Specific Operating Procedures, Forms etc. on any mobile device.

Experience Matters

We are a team based in Canada and India, composed of passionate individuals with extensive experience in Operations, Maintenance, Health and Safety, both nationally and internationally. Our goal is to enhance global workplace safety by offering creative cloud-based solutions for Operations and Occupational Health and Safety. We complement these offerings with advisory and management services to evaluate and facilitate organizational transformations.
